Verification Report

A printable snapshot of the evidence shown by Signature Validator.

Verified

The document and its signatures are trusted

Three embedded signatures were successfully verified. Certificate trust and eIDAS qualification were evaluated using authenticated EU Trusted Lists.

Registry evidence

Prototype verified

Prototype Notarity record verified

The exact document hash, registered signer certificates, and signed registry receipt all match.

Transaction ID	NOT-DEMO-POA-001
Document fingerprint	Exact match
Registry receipt	Valid
Participant matches	3 of 3
Notarity seal	Matched
Audit receipt	Signed prototype registry evidence available

Notary directory

No match in current snapshot

No named person signer matched the limited Austrian notarial-signature directory snapshot.

Static snapshot — Retrieved 02 Aug 2026

This report records the validation result observed at the generation time. It does not replace the original electronically signed document.

The Notarity registry and Austrian notary-directory results use prototype or static snapshot data and do not query Notarity production systems.
